

**Announcement of stipends for studies in
PK and PD of Anticancer drugs
at the Department of Pharmacy, Uppsala University**

The Pharmacokinetic-Pharmacodynamic (PKPD) group at Uppsala University announces stipends for modelling and simulation studies in the area of PK and PD for anticancer drugs.

The research environment includes approximately 40 active data analysts working with pharmacokinetic and pharmacodynamic modelling projects related to drug development, drug usage and methodology development. Each stipend is for 32.000 SEK, covering studies for two months, and is supported by the Swedish Cancer Society and/or Swedish Childhood Cancer Fund. Please apply with CV before May 2, 2022. For the successful candidates, the studies should commence in mid/late-June, 2022.
